Professional Summary

Frontend developer skilled in MERN stack development with a proven ability to create reusable UI components that enhance user experiences. Recognized for implementing responsive designs that ensure seamless cross-platform compatibility. Adept at collaborating in team environments and continuously learning new technologies.

Experience

Goodtech HQ / Frontend Developer
MAY 2025 - PRESENT, Remote

I developed and maintained user-facing websites using modern frontend technologies, ensuring seamless functionality and engaging user experiences. I created reusable UI components and applied responsive design to enhance usability and efficiency.
I collaborated in team environments using Git for version control to effectively manage source code repositories.
I collaborated in team environments using **Git for version control** to effectively manage source code repositories.

Freelancer / Fullstack developer
APRIL 2024 - PRESENT, Remote

I built fully functional websites and landing pages that generated leads and improved business visibility for my clients. Also built whatsapp bots and live agents to improve customer service for these businesses. All solutions were built for speed, mobile responsiveness and SEO.

Education

University Of Benin / Bsc Agriculture

SEPT 2016 - DEC 2022, BENIN CITY

I got my bachelor's degree in agriculture at the prestigious university of Benin Edo state.
